

IN THE SPECIFICATION

Please amend the paragraph beginning on Page 4, Line 15 and continuing to Line 20 to read:

In accordance with another object, the present invention provides a portable communication terminal comprising a plurality of dipole antennas adapted to ~~simultaneous~~ simultaneously perform the same communication, and phase control means for controlling respective phases of powers to be fed to the dipole antennas. The portable communication terminal may further comprise power distribution ratio adjusting means for adjusting a distribution ratio of powers to be respectively fed to the dipole antennas.
